What is Panagenda MarvelClient Upgrade

MarvelClient Upgrade is one of several other modules available for MarvelClient Essentials.

Allows Notes client upgrades

Base is Panagenda MarvelClient Essentials

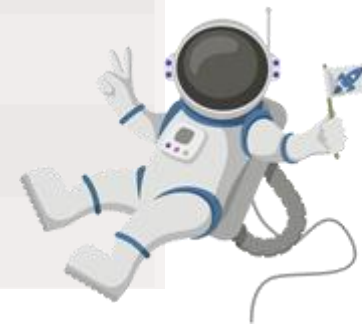

Panagenda MarvelClient Essentials

- Get important information about IBM Notes client infrastructure
- MarvelClient Basic provides you with analysis and up-to-date information on all installed Notes clients
- The information includes versions of IBM Notes clients, desktop icons, bookmarks, notes.ini, client hardware / software, and so on.

Panagenda MarvelClient Upgrade Free

Install IMSMO – IBM Mail Support for Microsoft Outlook		✓
Install any Windows Software		✓
Customize Splash Screen		✓
Support		✓

How to get a free MarvelClient Upgrade

- If you already have MarvelClient Essentials, go [here](#) to get a free license
- If you do not already have MarvelClient, register [here](#) or read the following [link](#)

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- MarvelClient Upgrade Free will only (yet) support the following installation packages
- :
- IBM Notes 10.0.1 - angličtina nebo jiný dostupný jazyk
- IBM Notes 10.0.1 -vícejazyčné uživatelské rozhraní - skupina 1, 2a, 2b a 3
- IBM Notes 10.0.1 Fix Pack 1
- Soubor IBM Swift 4.2.1

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- If you received a license key, enter it in the MarvelClient configuration database
- After entering the license key, run the Online Update and download the Upgrade components.

The screenshot shows the Panagenda MarvelClient Upgrade Wizard interface. On the left is a navigation menu with the following items: Welcome!, MarvelClient, General, MarvelClient Upgrade, MarvelClient Mail, MarvelClient Automate, and Administration. Under Administration, the following sub-items are listed: Online Update (highlighted), License Updates, DLL Updates, Eclipse Updates, and Installation.

The main content area has a header that reads: "This document allows you to Update MarvelClient. The MarvelClient databases, your license, language tables, and available Client Plugin and DLL/binary files will be updated." Below this are two tabs: "Settings" and "Progress".

The "Settings" tab is active and shows the "Online Update configuration" section. It contains the following options:

- Update MarvelClient Essentials Enter a license key
- Update MCUUpgrade - Enter a license key

Below these options is a "License Key:" field with a text input box.

The "Update-Type?" section contains the following options:

- Update this database
- Update this database (selective)
- Auto-Prepare update for a different database
- Manually prepare update for a different database
- Install prepared update

The "Update directory:" field contains the text: "%DATA%\panagenda_update" with a small icon to its right. Below this is a checkbox labeled "I herewith accept the license agreement according to" followed by the URL "http://www.panagenda.com/legal".

At the bottom of the form is a blue button labeled "Check for Update".

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- Open MarvelClient Configuration, expand "MarvelClient Upgrade" in the navigation, open the "Configuration (s)" view and create a new "Upgrade Configuration" action

The screenshot displays the Panagenda interface. On the left, the navigation menu includes 'Welcome!', 'MarvelClient', 'General', 'MarvelClient Upgrade', and 'MarvelClient Mail'. The 'MarvelClient Upgrade' section is expanded, showing sub-items: 'Configuration(s)', 'Installers etc.', and 'MCUpgrade Files'. The 'Configuration(s)' item is highlighted with a red box. The main content area shows a table with a header row containing 'MCUC. MCUpgrade Config' (highlighted with a red box) and 'Categorize'. Below the header, the table has columns for 'Package Name ^' and 'Title', with several empty rows below.

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- On the „**Distributions**“ tab, you can choose whether the package distribution to your clients will be handled by MarvelClient itself or your own solution.
- If MarvelClient is to deploy a package, you must determine from which source the clients will download the upgrade package. You can choose between a file path (UNC or mapped drive) and a URL (https or http).

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- On the „**Conditions**“ tab, you can easily select the required conditions for configuring the upgrade.

Distribution	Conditions	Elevation	User Experience	(Un)Install	Tracking
Simple Conditions (for more Conditions, see When tab at the top)					
Admin/Designer:	<input checked="" type="radio"/> Exclude clients with Admin and/or Designer client <input type="radio"/> Include clients with Admin and/or Designer client <input type="radio"/> Only upgrade clients with Admin and/or Designer client				
Target Notes version:	<input checked="" type="checkbox"/> Run Upgrade only if client is older than the following release ... If 10000100 Examples: 10000100 for 10.0.1, 9000109 for Notes 9.0.1FP9; also see notes.version.number				
Target Hotfix:	<input type="checkbox"/> Run Upgrade only if client release string does not contain ...				
Target OS version:	<input type="checkbox"/> Run Upgrade only if windows build is at least ...				
Exclude Citrix:	Citrix Clients are always excluded.				

[Switch to next tab ...](#)

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

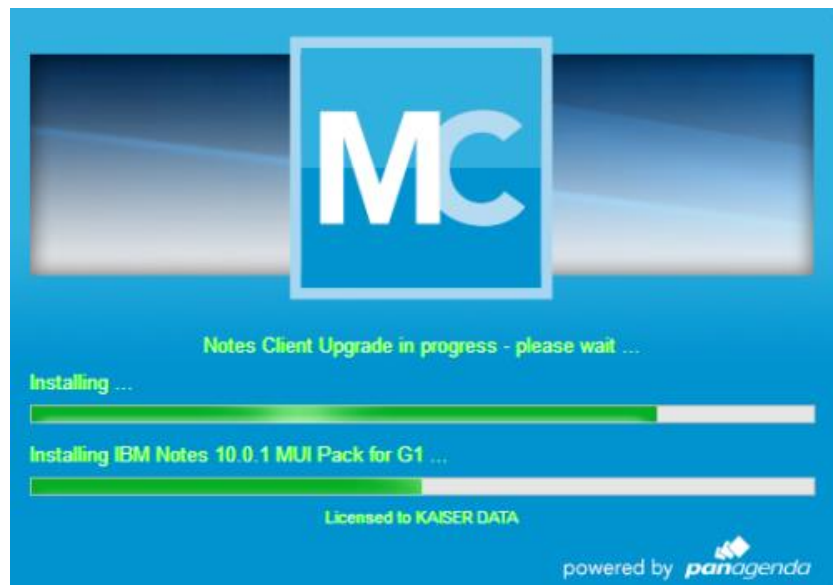

„**Elevation**“ Tab. In order to install the software on a user's computer, MarvelClient allows you to choose from the following options:

- Run via MC using local or domain Admin account rights
- Run over MC by using Windows Services
- Configure MCUpgrade by using MC and run over custom solutions
- Deployment and operation through custom solutions

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- During the upgrade process, an update of the MC with a progress screen appears
- MarvelClient Upgrade Free customers can choose between 10 different designs that can be configured on the User „**Experience**“ tab

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- One of the most important tabs of the MC Upgrade Wizard is the "**(Un) Install**" tab, which controls whether the current client will be uninstalled before starting a new installation
- Recommendation: If you are not only installing the fix pack and other packages, you will uninstall the current IBM Notes client using NICE (included).

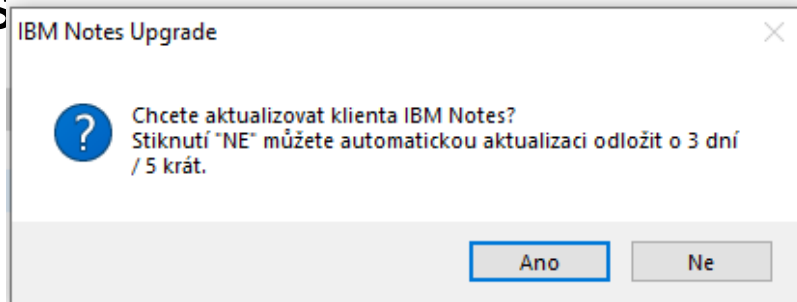

How to create an IBM Notes update package using the MarvelClient Upgrade Wizard

- MarvelClient is able to send "Progress Reports" on the fly during the upgrade, as well as final reports and upgrade completion via SMTP. Setting is on the "**Tracking**" tab
- You can also set who and when to start the upgrade
- Finally, you will release the update package using the "**Prepare or Publish Upgrade**" button

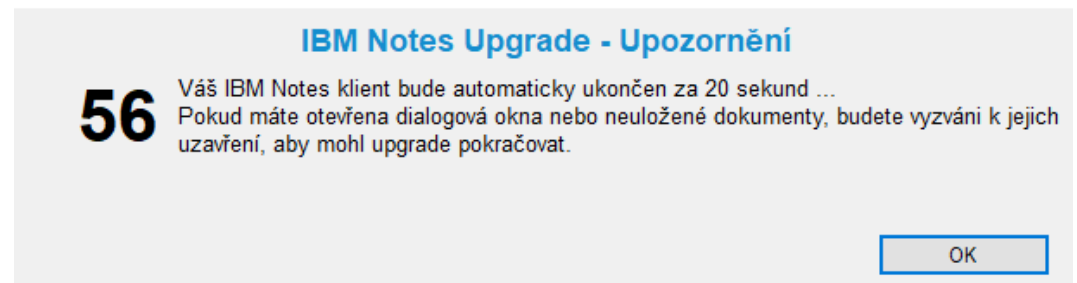

Upgrade Installation Progress

- It all depends on your settings, but eg.
- The user logs into the Notes client and then reports that the upgrade will occur
- Throughout the installation, the user is informed of the progress and status

Localizing the upgrade process bar

- I prepared Czech localization for Panagenda ;-)
- Is already part of the last MarvelClient version (if not, contact me for localization file)
- On the initial screen, select „Wizard mode“, select „Give me all the options“. You will see the „Language (s)“ where you choose the appropriate language
- Other languages are available, such as Russian, Italian, Japanese, Spanish, German, Danish

Localizing the upgrade process bar

Language(s) | Distribution | Conditions | Elevation | User Experience | Preparation | (Un)Install |

Language Settings

Language Settings:

Display any messages in ONE language

Display messages in multiple languages

For multilanguage support, you adjust all messages in your desired default language (u document. Other languages can be customized using MCUUpgrade_language.ini files in MCUUpgrade_ja.ini, MCUUpgrade_de.ini etc.). If a language file does not exist, messages document. Simply choose the desired languages below. If you wish to add your own lan (=override), download the corresponding language files from [here](#) , select the [custom/

<input checked="" type="checkbox"/> DE - German	<input checked="" type="checkbox"/> JA - Japanese	<input checked="" type="checkbox"/> RU - Russian	<input checked="" type="checkbox"/> CS - Czech
<input checked="" type="checkbox"/> ES - Spanish	<input checked="" type="checkbox"/> NL - Dutch	<input checked="" type="checkbox"/> IT - Italian	<input type="checkbox"/> Custom/Override

IBM Notes Upgrade - Upozornění

51

Váš IBM Notes klient bude automaticky ukončen za 20 sekund ...
Pokud máte otevřena dialogová okna nebo neuložené dokumenty, budete vyzváni k jejich uzavření, aby mohl upgrade pokračovat.

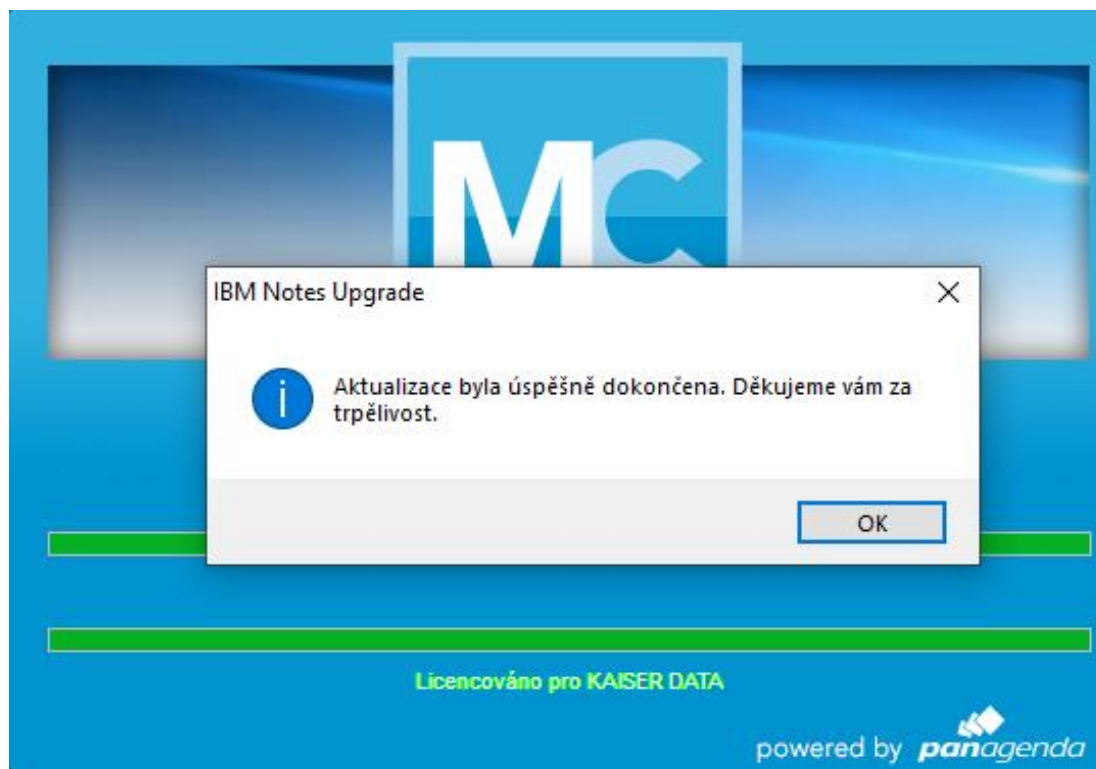

IBM Notes Upgrade - Opakovat

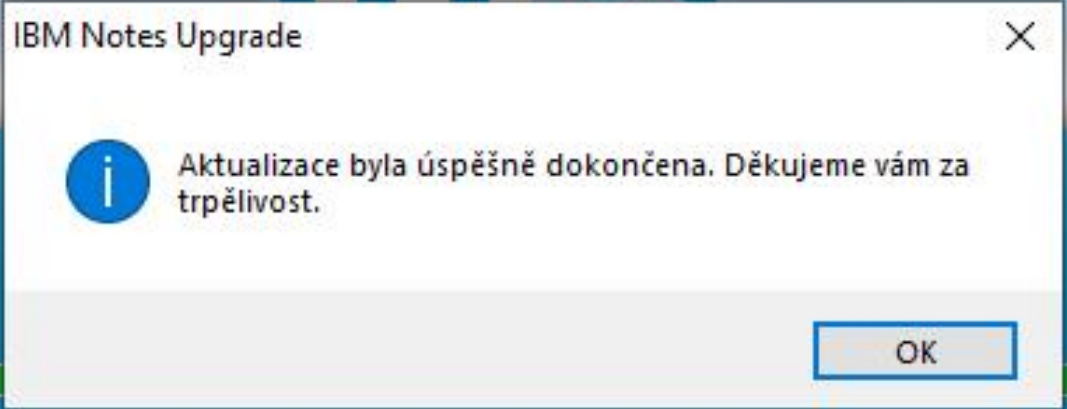

IBM Notes Upgrade - Opakovat

20

IBM Notes se zdá být uzamčen nebo máte neuložené dokumenty.
Zavřete všechna otevřená dialogová okna a neuložené dokumenty. Po dokončení klepněte na tlačítko OK.

OK

IBM Notes Upgrade

 Aktualizace byla úspěšně dokončena. Děkujeme vám za trpělivost.
